

Table of Contents**7th FECS Conference on Chemistry and the Environment: Metal Speciation in the Aquatic Environment**

- 2-3 Programme
4 Contents
5 Preface
Maria Teresa Vasconcelos
6 About FECS and the Division for Chemistry and the Environment (FECS-DCE)
Allan Astrup Jensen
7-80 Abstracts

Opening Address [OA]

- 7 The Evolution of the Usage of Chemical Elements by Biological Systems
J.J.R. Fraústo da Silva

Key Notes - Session 1 [KN 1.1 – KN 1.5]

- 8 Accuracy and traceability concepts applied to environmental speciation analysis
Philippe Quevauviller [KN1.1]
9 Chemometric techniques for the study of acid-base and complexation equilibria of humic substances
Adélio Machado [KN1.2]
9 Analytical speciation: Sources of errors and consequences on the quality of environmental data
Armando Duarte [KN1.3]
10 Chromatographic and spectrometric investigations of metal-NOM interactions in aquatic samples
Fritz Frimmel [KN1.4]
11 Hyphenated ICP-MS for metal speciation
Sergio Facchetti [KN1.5]

Key Notes - Session 2 [KN 2.1 – KN 2.7]

- 12 Towards in situ measurement of metal speciation and spatial distribution
Jacques Buffle [KN2.1]
12 Determination of trace metal using renewable surface biosensing systems
Salvador Alegret [KN2.2]
13 Copper(II)/Copper(I) in natural systems
M. Lurdes Gonçalves [KN2.3]
13 Organic complexation of biogenic metals in ocean waters
Constant van den Berg [KN2.4]
14 Trace metal speciation in estuarine waters implications
John Donat [KN2.5]
15 Free ion controls on Zn and Cd uptake by phytoplankton in estuarine and oceanic waters
William Sunda [KN2.6]
15 The biological cycling and role of cadmium in the oceans
Francois Morel [KN2.7]

Key Notes - Session 3 [KN 3.1 – KN 3.2]

- 16 Effects of exposure-water chemistry on acute metal toxicity to fish
Russel J. Erickson [KN3.1]
17 Biological response of aquatic biota to the organometallic ecotoxicants
Valery S. Petrosyan [KN3.2]

Oral Presentations - Session 1 [OP 1.1 – OP 1.12]

- 18 Use of selective extractions to assess the bioavailability of inorganic mercury in sediments and soils
Nicolas Bloom [OP 1.1]

- 18 Metal speciation in natural waters – Measurements and modelling
Hao Zhang [OP 1.2]
- 19 Radiotracer techniques for copper speciation kinetics determinations
Jacco van Doornmalen [OP 1.3]
- 19 Investigation of the distribution of bivalent metal ions among different species in seawater by sorption on complexing resins with different sorbing properties
Maria Pesavento [OP 1.4]
- 20 Determination of arsenic(III) and arsenic(V) in natural waters by cathodic stripping voltametry at a hanging mercury drop electrode
Aquiles Barros [OP 1.5]
- 20 Factors that influence the rate and extent of the seawater solubility of aerosol associated trace metals (Cu, Pb and Zn): Impact on their seawater speciation
Angela Medway [OP 1.6]
- 21 Elemental association of trace metals in urban river sediments through laser ablation-inductively coupled plasma-mass spectrometry
Sebastien Rauch [OP 1.7]
- 21 Fluorescence characterisation of organic ligands for copper(II) using immobilised metal ion affinity chromatography (IMAC) and excitation emission matrix spectroscopy (EEM)
Fengchang Wu [OP 1.8]
- 22 Characterisation and accurate determination of dissolved elemental species of humic substances by coupling HPLC with inductively coupled plasma mass spectrometry
Klaus Heumann [OP 1.9]
- 22 In-situ and high spatial resolution measurement of trace metals concentration profiles in sediment pore waters with DGT and LA-ICP-MS
Mikael Motelica-Heino [OP 1.10]
- 23 Effect of aluminium competition on lead and cadmium binding to humic acids
Marc Benedetti [OP 1.11]
- 23 Polarographic analysis of heavy metal speciation and contamination at Teesmouth estuary, United Kingdom
A.O. Ibadon [OP 1.12]

Oral Presentations - Session 2 [OP 2.1 – OP 2.11]

- 24 Mercury methylation potential in aquatic macrophytes and periphyton of the Everglades nutrient removal area, Florida (USA)
Jane Mauro [OP 2.1]
- 24 Methylmercury and total mercury in three different marine organisms from Guanabara Bay - Rio de Janeiro, Brazil
Helena Kehrig [OP 2.2]
- 25 The distribution of total mercury and methylmercury in a lake ecosystem using a mass balance approach to determine the effect of intense fishing
Alain Tremblay [OP 2.3]
- 25 Influence of salinity and eutrophication on the biosorption of the radioactive waste product technetium-99 in duckweed
Jasper Hattink [OP 2.4]
- 26 Effects of zinc on the phosphorus availability to periphyton communities in the river Gota Alv
Maria Paulsson [OP 2.5]
- 26 Bioavailability of copper in runoff water of a wine-growing Mediterranean catchment (Southern France)
Rodolphe Gilbin [OP 2.6]
- 27 Factors affecting copper toxicity to the unicellular algae *Nitzschia closterium* in Macquarie Harbour, Tasmania
Simon Apte [OP 2.7]

- 27 Vanadium association with membrane bound transport systems
Manuel Alves [OP 2.8]
- 28 Uptake of cadmium adsorbed on particulates by gills of goldfish *Carassius auratus*
Shu Tao [OP 2.9]
- 28 DNA damage and repair in the coastal blue mussel *Mytilus edulis* in response to heavy metal exposure
Audrey Pruski [OP 2.10]
- 29 Uptake of lanthanides by duckweed is governed by the photodegradation of FeEDTA
Lennart Weltje [OP 2.11]

Oral Presentations - Session 3 [OP 3.1 – OP 3.9]

- 30 Lead speciation in Tagus Estuary
Ana Mota [OP 3.1]
- 30 Bioaccumulation and detoxification of heavy metals in *Bathymodiulus azoricus* (Von Cosel et al.,1998) from Azores hydrothermal vents on Mid-Atlantic Ridge
Aline Fiala-Médioni [OP 3.2]
- 31 Metal content in the environment surrounding hydrothermal vent communities: Preliminary approach and outlook
Pierre-Marie Sarradin [OP 3.3]
- 31 Metal compartmentalisation and metallothionines in the shrimp, *Rimicaris exoculata*, from the Mid-Atlantic Ridge; preliminary approach to the fluid-organism relationship
Richard Cosson [OP 3.4]
- 32 Metals accumulation in sediments and whitefish of Kola Peninsula lakes, Murmansk region, Russia
Vladimir Dauvalter [OP 3.5]
- 33 Effect of remobilization on redox potential, metal speciation and toxicity of contaminated sediment layers. The case of arsenic, cadmium and lead
H. Percherancier [OP 3.6]
- 33 German Federal Environmental Specimen Bank: Retrospective monitoring of organotin compounds in marine samples and evaluation of results
Heinz Rüdél [OP 3.7]
- 34 Trace metal speciation in the Lagoon of Venice. Relation with dissolved-particulate metal partition
Gabriele Capodaglio [OP 3.8]
- 34 Pathways of TBT accumulation in the clam *ruditapes decussatus*
Maria João Bebianno [OP 3.9]

Poster Presentations - Session 1 [PP 1.1 – PP 1.35]

- 35 Speciation of organotin and methylmercury compounds by GC-MIP-AED in water, soils, sediments and biological materials - The application for routine controls
Jean-Marc Camou, Stéphane Dupeyron, Ingrid Heninger [PP 1.1]
- 35 A microwave-assisted extraction method for methylmercury determination in sediments
E. Ramalhosa, S. Rio, E. Pereira, C. Vale and A. Duarte [PP 1.2]
- 36 The chromatographic trapping and separation of chromium species prior to atomic absorption spectrometric detection
David J. Roberts, Nisakorn Thongkon [PP 1.3]
- 36 Oriented chemical-thermodynamic modelling of the speciations of heavy metals (Cu, Cd, Pb) in fresh-water reservoirs
Vladimir I. Belevantsev, Boris S. Smolyakov, Alexandr P. Ryzhikh, Mikhail V. Zhigula [PP 1.4]
- 37 Determination of methyltin species by cathodic stripping voltammetry
Helena M.V.M. Soares, Sónia M.O. Teixeira [PP 1.5]
- 37 Inorganic speciation of arsenic in natural waters by square wave cathodic stripping voltammetry
M.M. Correia dos Santos, Cristina Maria Barra [PP 1.6]
- 38 Speciation of copper and iron using tangential cross-flow ultra-filtration combined with micro-extraction

- in small sample volumes
Martin M. Larsen, Signe Foverskov, Britta Pedersen [PP 1.7]
- 38 Determination of some arsenic compounds in aqueous extracts
Mekta Slekovec [PP 1.8]
- 39 Zinc speciation in a UK estuary
Mike J. Gardner [PP 1.9]
- 39 New principles of heavy metals bioidentification in fresh water
Valerii Tonkopii, Svetlana E. Slotina [PP 1.10]
- 40 Speciation of arsenic species by electrothermal atomic absorption spectrometry using a tungsten furnace, through benzene extraction and cobalt (III) oxide powder collection
Tomohiro Narukawa [PP 1.11]
- 40 Determination of bismuth in real samples by electrothermal atomis absorption spectrometry and chemical modification
Efrosini Piperaki, Stella Samartzi, Vassilis Papamichael [PP 1.12]
- 41 The use of microwave single extractions for metal fractionation in sewage sludge samples
Benita Pérez-Cid, A. Fernández-Alborés, E. Fernández-Gómez, E. Falqué-López [PP 1.13]
- 41 Study of the influence of dissolved organic matter on selenium speciation
T. Ferri, P. Sangiorgio [PP 1.14]
- 42 Determination of zinc complexation with natural complexing ligands in lake waters – A case of study
Maria do Carmo Rollemberg, Rodrigo Nogueira Guimarães, Andrea Fabiana Garcia [PP 1.15]
- 42 Electrochemistry and speciation of ethylenediamine disuccinic acid (EDDS) and its complexes with transition metals
A.M. Crouch, M. Polhuis, L.E. Khotseng [PP 1.16]
- 43 Distribution of trace metals in the Adour estuary
C. Guéguen, J. Dominik, A. Amouroux [PP 1.17]
- 43 Measurement of chromium speciation in solution by DGT
H. Ernstberger, W. Davison, H. Zhang [PP 1.18]
- 44 Speciation of lead in water by GC-MS and HPLC-ICP-MS
F. Barbier, J.L. Imbert, P. Tallone [PP 1.19]
- 44 Highly sensitive detection of hazardous heavy and transition metal cations: a new type of fluorescent probes selective for Hg(II), Cd(II), Ag(I) and Cu(II)
Gunther Hennrich, Helmut Sonnenschein, Ute Resch-Genger [PP 1.12]
- 45 Identification by liquid chromatography-electrospray ionization-tandem mass spectrometry (HPLC-ESI-MS/MS) of organoarsenic species previously separated and quantified by HPLC-MW-HG-QFAAS
A.M. de Bettencourt, C.M. Carapeto, M.L. Gomes, M.H. Florêncio, L.F. Vilas Boas, B.R. Larsen [PP 1.21]
- 45 Heavy metals in sediments and laboratory analytical performance: the quasimeme contribution
Carla Palma, Manuel Valença [PP 1.22]
- 46 Kinetic study of potential mobility and toxicity of heavy metals in river sediments
Jesús Rodríguez Procopio, M Jesús Gismera García, Javier Lacal del Val, M Teresa Sevilla Escribano, Lucas Hernández Hernández [PP 1.23]
- 46 Liquid-chromatography mass spectrometry for the determination of siderophores
Martha Gledhill [PP 1.24]
- 47 Temporal and spatial distribution of metals in aquatic organisms in Taiwan
Bor-Cheng Han, Ming-Shiou Jeng [PP 1.25]
- 47 Development and complete validation of a method for the determination of dimethyl mercury in air and other media
Nicolas S. Bloom, Beverly van Buuren [PP 1.26]
- 48 Analysis of environmental levels of tributyltin in sediments of the portuguese Sado river estuary
J.M.F. Nogueira, P. Teixeira, M.H. Florêncio, A.M.M. Bettencourt [PP 1.27]
- 48 Complexation capacity titrations on sewage effluents

- E. M. Dixon [PP 1.28]
- 49 SOFIE: An integrated test-system for the determination of chemical-toxicological transfer functions for heavy metals in sediments
Jos Vink [PP 1.29]
- 49 Comparative study of phosphate rock solubilisation with a non-specific bacterium
R. Mocanu, T. Gavriloaiei, Al. Duca [PP 1.30]
- 50 Schiff bases, analytical reagents for the spectrophotometric determination of Al (III). A preliminary study in view of an elisa application
Raluca Mocanu, Vasile Dorneanu, Gladiola Tântaru, Monica Stanciu, Liviu Stoica [PP 1.31]
- 50 Artifact in the speciation of sulfides in anoxic estuarine sediments
B. Ouddane, G. Billon, A. Boughriet, M. Wartel [PP 1.32]
- 51 Electrochemical and spectrophotometric analysis of heavy metal contamination and nutrient enrichment in a European estuary
A. O. Ibhaddon, K. Peat, R. Akera [PP 1.33]
- 51 Heavy metal speciation and contamination of the north sea coastal waters
A .O.Ibhaddon [PP 1.34]
- 51 Methyl Mercury: Low level measurements under a quality management system for environmental mercury speciation studies
Don Anthony, Sean Backus, Donna Zaruk, Steve Cagampan [PP 1.35]

Poster Presentations - Session 2 [PP 2.1 – PP 2.28]

- 52 Synthesis and the stability of the phytochelatin pool induced by Cd and Pb in *Phaeodactylum tricornutum*
Elisabetta Morelli, Gioacchino Scarano [PP 2.1]
- 52 Metal speciation dynamics and bioavailability: radial diffusion effects in the microorganism range
José Paulo Pinheiroa, Herman P. Van Leeuwen [PP 2.2]
- 53 Energy dispersive x-ray fluorescence for analysis level of iron on olive leaves in the mediterranean region
P. H. A. Aragão, R. Cesareo, F. Balogun, U. Prota and M. Fiori, S. Maccaddu, E. Gariba and G. Micera [PP 2.3]
- 53 Microbial response to elevated copper concentrations in a naval harbor
Christina L. Dryden, Andrew S. Gordon, John R. Donat, John A. Consolvo [PP 2.4]
- 54 Metallothionein and trace metal measurement in marine biota
Bryn Jones [PP 2.5]
- 54 Dissolved lead in Galician Ria Water (NW Spain): speciation at enhanced concentrations
Antonio Cobelo-Garcia, R. Prego, O. Nieto [PP 2.6]
- 55 Anionic surfactant effects on anaerobic sludges: solubilization of metals
Estilita Ruiz Romera, Begoña Osuna González, Jon Iza López [PP 2.7]
- 55 Metal speciation in the Gulf of Elefsis, Greece. Preliminary results on the role of *Ulva rigida*
S. Karavoltos, M. Dasenakis, M. Scoullas [PP 2.8]
- 56 Influence of water quality characteristics on the bioavailability and toxicity of zinc towards three freshwater species
D.G. Heijerick, C.R. Janssen [PP 2.9]
- 56 The pH effect in the biosorption of elements, specifically zinc and copper, by the *Trachelomonas hispida* (Perty) Stein emend. Defl. var. *coronata* Lemm. (Euglenophyta) loricae
Mário Jorge Pereira, A.R. Agra, J.A. Rino [PP 2.10]
- 57 Effect of transformation of the copper and lead species on their behaviour in real fresh water ecosystem
B.S. Smolyakov, V.I. Belevantsev, M.V. Zhigula, A.P. Ryzhikh [PP 2.11]
- 57 Adsorption and uptake of Cu by *Emiliana huxleyi* in natural seawater
M. Teresa S.D. Vasconcelos, M. Fernanda Leal [PP 2.12]
- 58 New ecotoxicological tools for risk assesment of an acid mine drainage impacted reservoir
Bruno Castro, Olímpia Sobral, Rui Ribeiro, Lúcia Guilhermino [PP 2.13]

- 58 Toxicity of oOganotin compounds to activated sludge
A. Stasinakis, N.S. Thomaidis, A.D. Giannis, A. Grigoropoulos, T.D. Lekkas [PP 2.14]
- 59 Toxicity of titanium and zirconium compounds to representative organisms of freshwater ecosystems
L. Guilhermino, A.S. Pereira, T.C. Diamantino, E. Almeida [PP 2.15]
- 59 Effects of humic substances on heavy metal toxicity to *Selenastrum capricornutum*
B. Koukal, C. Guéguen, M. Pardos, J. Dominik [PP 2.16]
- 60 Relationship between metallothioneins and metals in the clam *Ruditapes decussatus*
A. Serafim, M.J. Bebianno [PP 2.17]
- 60 Toxicity of nickel compounds to a standard species in ecotoxicology (*Daphnia magna*)
C. Antão, M.E. Soares, E. Bronze-da-Rocha, F. Carvalho, M.L. Bastos, L. Guilhermino [PP 2.18]
- 61 Trace metals and metallothionein levels in bivalve and crustaceans from Guadiana estuarine system (South of Portugal)
C.C. Ferreira, R.M. Company, H.C. Felícia, L.M. Machado, M.J. Bebianno [PP 2.19]
- 61 Organometallic compounds of mercury and tin as promoters for lipid peroxidation
E. Milaeva, N. Berberova, I. Kirillova, Yu. Pimenov, V. Tyurin, Yu. Gracheva, E. Kharitonashvili, E. Grigor'ev, V. Petrosyan [PP 2.20]
- 62 Aluminium bioavailability and toxicity to *Selenastrum capricornutum*
Pugazhendhi Thayumanavan, Jae-Hyuk Lee, Peter O. Nelson [PP 2.21]
- 62 Arsenic compounds in marine polychaetes
Anita E. Geiszinger, Walter Goessler, Kevin A. Francesconi [PP 2.22]
- 63 Species of trace metal, organic residues and humic substances in sediments from the Taiwan Erhjin river and coastal areas
Tsu-Chang Hung, Pei-Jie Meng, Aileen Chuang [PP 2.23]
- 63 Effects of copper contamination on development and growth in the *Fucus zygote*
H.D. Nielsen, M.T. Brown, C. Brownlee [PP 2.24]
- 64 The role of metallothioneins in marine molluscs
M.J. Bebianno, W.J. Langston [PP 2.25]
- 64 The combined effect of three water characteristics (pH, hardness and DOC) on the acute and chronic ecotoxicity of zinc towards *Daphnia magna*
D.G. Heijerick, C.R. Janssen [PP 2.26]
- 65 Heavy metals in polluted environments. A case study: streams in Buenos Aires metropolitan area (Argentina)
Anita Zalts, Silvana Ramirez, Enrique Hughes, Gabriel Gordillo [PP 2.27]
- 65 Antagonistic interactions of Pb and Cd on Cu sorption, *Emiliania huxleyi* growth and exudates releasing in natural seawater
M. Teresa S.D. Vasconcelos, M. Fernanda Leal [PP 2.28]

Poster Presentations - Session 3 [PP 3.1 – PP 3.30]

- 66 Assessment of toxicity of heavy metals accumulated in lake sediments
Vladimir Dauvalter [PP 3.1]
- 66 Arsenic speciation in aquatic system of the gold recovery plant
Olga Shuvaeva Tamara M.Korda, Olga S.Koscheeva [PP 3.2]
- 67 Lead(II) speciation in a polluted river. dissolved fraction
Cidália Botelho, R.A.R. Boaventura and M.L.S.S. Gonçalves [PP 3.3]
- 67 Soluble and insoluble fractions of heavy metals in wet and dry atmospheric depositions
Luciano Morselli, Barbarba Brusori, Matilde Cecchini, Fabrizio Passarini, Piera Olivieri [PP 3.4]
- 68 Localization and distribution of mercury species in the aquatic compartments of the katun river basin (West Siberia) polluted by Aktash Hg deposit
Stella S. Eyrikh, Tatyana S. Papina, Lyubov V.Rudneva [PP 3.5]
- 68 Simulation of acid-base condition and copper speciation in the fish gill microenvironment
Shu TAO and Yi Wen [PP 3.6]

- 69 Removing Cr(VI) from aquatic solutions using electron beam irradiation and different reducing agents
V.A.Ivanchenko, N.N.Kundo, O.P.Slyudkin [PP 3.7]
- 69 Mobility of heavy metals in a soil after oil olive mill residues application
V. Solinas, S. Deiana, A. Palma, S. Deriu [PP 3.8]
- 70 H₂O₂ formation from photocatalytic processes at the ZnO/water interface
Xavier Domènech and José Peral [PP 3.9]
- 70 Improvement of effluent and water treatment by chemical floc modification
H.J. Mawhinney, C. Hardacre, M.G. Burnett [PP 3.10]
- 71 Organotin determination in marine sediment and seawater from India by GC-ICP-MS
R. Babu Rajendran, H. Tao A.Miyazaki, R. Ramesh, S. Ramachandran [PP 3.11]
- 71 Trace metal level in freshwater fish, sediment and water
Zsuzsanna Sandor, Istvan Csengeri, Maria Oncsik [PP 3.12]
- 72 Fixation of carbon dioxide and resource recycling of waste concrete by coccolithophorid algae
(Gephyrocapsa oceanica)
Yoshiyuki Kojima and Tamotsu Yasue [PP 3.13]
- 72 Mobility of metals from agricultural soils; role of natural and synthetic ligands
Annette P. Aldrich, Laura Sigg [PP 3.14]
- 73 A case study of pollution by lead in intertidal sediments of San Simón Bay (Inner Ria de Vigo, NW Spain)
P. Álvarez-Iglesias, B. Rubio and F. Vilas [PP 3.15]
- 73 Contribution for the environmental evaluation of the electrolytic soil remediation technique
Alexandra B. Ribeiro, Eduardo P. Mateus, António G. Réffega, José M. Vieira e Silva [PP 3.16]
- 74 Speciation of heavy metals in estuarine sediments in the Northeast of Brasil
Fátima Maria Miranda Brayner, Ana Maria de Freitas Barbosa, Cássia Regina Chaves Ramos, Maria Carolina Dias Diniz [PP 3.17]
- 74 Transport of humic acid macromolecules and humic-coated clay colloids through aquifer materials:
influence of Na⁺, Ca²⁺ and trace metals
Rachid Aït Akbour, Jamaâ Douch, Mohamed Hamdani and Philippe Behra [PP 3.18]
- 75 Heavy metals geochemical distribution in fluvial sediments of Baixo Jacuí Region, RS, Brazil
E.C. Teixeira, L.S. Ortiz, J.D. Sanchez, M. Alves [PP 3.19]
- 75 Metal speciation and bioavailability in marine sediments of northern Adriatic sea
B. M. Petronio, M. Pietrantonio, M. Pietroletti and N. Cardellicchio [PP 3.20]
- 76 Partitioning of Cu and Mn between dissolved and particulate phases of a partially flushed and low saline
estuarine system
P. Unnikrishnan, C.H. Sujatha and S.M. Nair [PP 3.21]
- 76 Sediment quality in the Douro estuary based on heavy metal, toxicity and infaunal community
composition
A.P. Mucha, M.T. Vasconcelos and A.A. Bordalo [PP 3.22]
- 77 Species of organotins in imposex of rock shell and Hermaphroditic oysters from the western coast of
Taiwan
Tsu-Chang Hung, Yuan-Tung Hsu and Pei-Jie Meng [PP 3.23]
- 77 Mechanistic modelling of the distribution of heavy metals between suspended particles or soils, and waters
S. Lofts, A.J. Lawlor, E. Tipping [PP 3.24]
- 78 Predicted diffusive fluxes of mercury from contaminated oxic/suboxic sediments, Ria de Aveiro, Portugal
E. Ramalhosa, S. Rio, S. Figueiredo, E. Pereira, C. Vale, A. Duarte [PP 3.25]
- 78 Duration of post-impoundment increases in fish mercury levels at the La Grande Complex, Quebec,
Canada
A. Tremblay and R. Schetagne [PP 3.26]
- 79 Methylmercury and heavy metals in abiotic and biotic samples from Jequiá Mangrove - Rio de Janeiro,
Brasil
Helena do Amaral Kehrig, Fernando N. Pinto, Jane B. N. Mauro, Wolfgang C. Pfeiffer, Jean R.D.
Guimarães and Olaf Malm [PP 3.27]

- 79 Total and methylmercury levels in hair of a coastal human population and fish from the Brazilian Northeast
Nillson Sant'Anna Jr., Monica Costa and Hirokatsu Akagi [PP 3.28]
- 80 Fractionation of zinc and lead in different chemical phases of the surficial sediments of a fluvial estuarine system
P. Unnikrishnan, C.H. Sujatha and S.M. Nair [PP 3.29]
- 80 Lead isotopes ratios and lead concentrations for the identification of contamination sources in the French river Gave de Pau
Marie-Hélène Dévier, Sylvie Augagneur, Philippe Garrigues [PP 3.30]
