Front cover: The front cover reflects the Editorial 'The Future of Life Cycle Assessment' (pp. 305–308), which outlines the way of better exploiting LCA's potentials by means of two complimentary developments:

1. Development of implementation processes and related organizational approaches, which can close the gap between existing methodologies and tools, and practical implementation.
2. Extension of the environmental life-cycle view to also address economic and social aspects within sustainability.

Cover idea: David Hunkeler and Gerald Rebitzer, the authors of the Editorial.
