

# SimaPro

## The new SimaPro 7 offers you ultimate flexibility in LCA modeling and results analysis

- 1 Advanced parameterized modeling gives you almost unlimited flexibility. A wide range of (non linear) mathematical functions is supported.
- 2 Create and compare alternative parameter settings, and do sensitivity on the fly.
- 3 Include uncertainty on parameters for complete Monte Carlo analysis.
- 4 You can link directly to spreadsheets and databases. No need to enter or import data anymore!
- 5 Fully interactive results analysis, faster than ever! Get to the origin of any result in a few mouse clicks.
- 6 More data and impact assessment methods. The integrated ecoinvent 1.2 database is still included with professional licenses.
- 7 SimaPro 7 comes in various versions and license types to suit your needs and budget.

Test the flexibility of SimaPro 7 yourself! For a free demo visit
